PRESS RELEASE

PREVIEW OF THE EAGERLY ANTICIPATED RCV130-CD

RCV are pleased to announce the latest engine in their CD (Crank Drive) range. The **RCV130-CD** (1.3 cubic inches, 21.3 cc) continues the RCV tradition of producing high quality, high performance engines in a staggeringly low height package. Using the unique rotating cylinder valve technology, the RCV130-CD is around the same height as conventional .70 size 4-stroke engines.

RCV130-CD

The RCV CD range

Following on from the massive success of the RCV91-CD engine & RCV58-CD, the low profile, coupled with great price is sure to prove popular with modellers.

This eagerly awaited engine will be available in Spring 2007 when it can be purchased from many good model shops or from RCV direct. SSP for the 130CD is £245.

Full specifications and measurements can be found by visiting the RCV website:
www.rcvengines.com

Ends..... Wimborne, UK, Monday 22nd Jan 2007
